Storage Silo's Working Principle
How to Build A Steel Silo?
Why Choose Agico Cement Silo?
Selecting superior materials:
High intense hot rolled double galvanized coil are used to ensure steel silo's combination of stability, anticorrosion, air proof and good looking.
Short construction period: Short duration can be guaranteed for the onsite construction during the whole procedure and for our professional equipment can provide a 3-5m per minutes' shaping speed,
Selecting superior materials:
High intense hot rolled double galvanized coil are used to ensure steel silo's combination of stability, anticorrosion, air proof and good looking.
Short construction period: Short duration can be guaranteed for the onsite construction during the whole procedure and for our professional equipment can provide a 3-5m per minutes' shaping speed,
Saving resources:
Cost-effectiveness can be achieved for light sheets are used for the whole silo which made it just as heavy as the rebar of concrete silo. Comparably small coverage that could narr Wide range of cement silos' sizes:
Flexible choices on dimensions are provided in a range of diameters from 3m to 28m, and a height of 35m in theory to meet various demands.
