

# 2m high photovoltaic support

## Overview

---

The structures are modular in design using only two light gauge steel profiles and provide a very efficient support structure including the PV module support platform, legs and bracing all simply secured with self tapping screws. These support systems provide the necessary foundation for solar photovoltaic (PV) panels, ensuring stability, optimizing sun exposure, and extending the lifespan of solar installations. Whether you're setting up a solar farm, commercial installation, or residential system, choosing the right solar. Photovoltaic solar energy is one of the most economical and consolidated renewable sources in the market today. It is a photovoltaic support system supported by suspension structure. The suspension structure consists of a series of tensioned cables as the main load-bearing components.
