

40-foot photovoltaic container for ships

Overview

A standard 40-foot shipping container has 67.7 m³ of space, but actual capacity depends on panel dimensions and packaging. Wait, no – that's outdated. Modern high-density packaging now allows 900-1,200 panels in the same. Bulk shipping of solar panels is a very popular choice to use a 40-foot container. But just how many panels can fit into such a container?

This question is not merely academic; it has real-world implications for manufacturers, suppliers, and installers alike. Our photovoltaic kit NR' 40 XL offers an innovative and mobile solution for self-consumption. Depending on your geographic location, you can produce up to 9350 kWh per year. Package include 9 support rafters, 18 leg footings for corner-mount to standard shipping container, cross. Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more). It's equipped with a 3000 watt power.
