

# 425W solar panel dimensions and specifications

## Overview

---

2 pounds, it's built to withstand high snow (5400 Pa) and wind (3600 Pa) loads. Solar panels vary in size based on the manufacturer, and the dimensions often have to do with the number and size of solar cells in each panel as well as the cell type (usually half cell/half-cut cell or full cell). 4". Built specifically for use with the SunPower Equinox™ system, the only fully integrated solution designed, engineered and warranted by one manufacturer. Highest Power Density Available. SunPower's new Maxeon® Gen 5 cell is 65% larger than prior generations, delivering the most powerful cell and. The LG NeON® R series has been designed for high-power output making it efficient even in limited space. The NeON® R series offers a 25-year limited warranty for performance, product and labor. 5% of their labeled power output. The LG. STC: Irradiance 1000 W/m<sup>2</sup>, Cell Temperature 25°C, Air Mass AM1.°C Rated power of the module at STC will not exceed the Power Optimizer Rated Input DC Power. Modules with up. Our premium kits include IronRidge XR rail systems, compatible with all our solar panels and available for all roof types, with special options for tile, flat, and metal roofs at competitive wholesale pricing. Let us know what you're after through this form or by contacting a location near you and we'll promptly get you a quote with pricing and local availability. We'd love to work with you!.
