

451 solar-powered communication cabinet inverters in west asia are connected to the grid

Overview

energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country. Every solar panel and battery connected to the U. A Reuters investigation, citing two individuals familiar with the matter, revealed. U. This has prompted US energy officials to re-assess the risks of emerging technologies produced in China. Power inverters are. Rogue communication devices found in Chinese inverters Power inverters, which are predominantly produced in China, are used throughout the world to connect solar panels and wind turbines to electricity grids.
