

AGC dispatch frequency of energy storage power station

Overview

The increasing penetration of renewable energy into power grids is reducing the regulation capacity of automatic generation control (AGC). Thus, there is an urgent demand to coordinate AGC units with acti.

AGC dispatch frequency of energy storage power station

Energy storage agc frequency modulation solution

The rapid frequency and pressure regulation system of Hopewind New Energy Station can cooperate with the group control platform of the station to achieve AGC/AVC closed-loop control. The system ...
