

Albanian Offshore Wind Power and Energy Storage Project

Overview

With its abundant renewable resources, strategic geographic position, and ambitious policy targets, the country is emerging as a compelling destination for investors seeking exposure to Europe's next green frontier ULCC--. The Albanian power system is dominated by hydropower plants, representing 95% of the country's installed capacity with a total of 2,096 MW installed, hence making Albania the country with the highest share of renewable energy generation in South-East Europe. Through strong partnerships, cutting-edge expertise, and a commitment to sustainability, CWP is shaping the future of. If provided by the financial institution, the Early Warning System Team writes a short summary describing the purported development objective of the project and project components. Review the complete project documentation for a detailed description.
