

Antigua and barbuda demand response

Overview

An IMF delegation headed by economist David Moore has ended a two-week mission to the Caribbean island, noting that the most recent data indicate real gross domestic product (GDP) growth of 2.5% in 2024, reflecting a mix of strong tourist arrivals and slower construction activity. At the same time, challenges remain. pandemic era. 8 per cent (2021 to 2024) in real ter. The favorable output performance contributed to improvements in public finance, labour market conditions, and to financial sector stability, although prices ended significantly higher. External sector operations buoyed by a strong recovery in. The International Monetary Fund (IMF) has projected a continued expansion of Antigua and Barbuda's economy in 2026 while urging vigilance against global and domestic risks that could derail progress. In a concluding statement issued after an Article IV.
