

Application of ground solar energy systems in the Democratic Republic of the Congo

Overview

Over 17 off-grid solar companies are registered in the DRC; of which a handful of companies, including Congolese companies such as Altech, GoShop and Weast Energie, and international companies such as BBOXX and Orange Energie, have sold over 200,000 solar lanterns. Over 17 off-grid solar companies are registered in the DRC; of which a handful of companies, including Congolese companies such as Altech, GoShop and Weast Energie, and international companies such as BBOXX and Orange Energie, have sold over 200,000 solar lanterns. Dam to deliver needed energy for mines and generate foreign revenue. However, this project has been repeatedly stalled because of its complexity, expense, and environmental energy supplied by the proposed Inga 3 Dam – and at a lower cost. This brief details the potential for solar photovoltaic (PV) and. The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. 6 million have access to electricity. As the world shifts towards renewable energy sources, the DRC is positioning itself to harness solar power through utility-scale solar projects.
