

Are photovoltaic panels bad for your health

Overview

Claims that solar panels cause cancer or other health problems are unfounded and not supported by scientific research. When looking for a house to live in, recently, I noticed that those with solar panels made me VERY ill, within seconds. As I own a rf (radio-frequency radiation) meter (a Cornet 88T Plus), I began measuring these sorts of homes. Solar panels convert sunlight directly into electricity, involving components that warrant a factual examination of associated. The short answer is that a properly installed and certified solar panel system is incredibly safe, offering more health benefits than risks. The potential health and safety concerns often stem from misinformation.
