

# Are photovoltaic panels too heavy

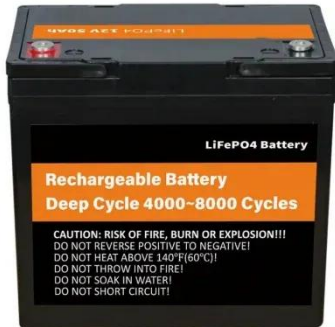

## Overview

---

Before you swap your shingles for solar, here's a straightforward answer: no, solar panels are not too heavy for the roof. Let's examine typical solar panel weight, roof load capacities, and how to ensure your roof can support photovoltaic arrays. Subscribe to Itek Energy!. The weight of photovoltaic (PV) modules is more than just a logistical concern for the installation crew; it directly impacts structural safety, transportation costs, and even the type of racking system required. These can include roof damage or infrastructure problems, depending on your home's. Most homeowners use silicon-based photovoltaic (PV) panels, typically available in 60-cell or 72-cell configurations. A standard 60-cell panel weighs between 35 and 42 lbs (16-19 kg). Solar mounting racks, rails, and hardware add.
