

# Are solar mounts the same

## Overview

---

While photovoltaic (PV) modules capture the sun's power, it is the solar mounting system that provides the critical foundation, ensuring stability, optimal angle, and long-term durability. Often called solar racks or racking, these systems are the unsung heroes of any successful. Solar panel mounts are the supporting structures that secure solar panels in place. These mounts are usually lightweight and adjustable, allowing panels to tilt for maximum sun exposure.

## Are solar mounts the same
