

Assembling a portable solid-state power bank

Overview

Building a DIY power bank might seem like an intriguing idea, but the hands-on reality involves real electrical handling and technical complexity that most people underestimate. In this instructables I will show you how you can make your own power bank using easily available and inexpensive components. This backup battery contain 18650 li-ion battery from old laptop or you can buy new ones. Later I made a wooden casing with cool looking Plexiglas lights to have a cooler. A DIY portable power bank pairs protected lithium cells with a charge/boost board in a vented case to deliver stable 5V USB power. Building a pocket charger is a satisfying weekend project. You learn how cells store energy, how the charge cycle works, and how to wire cleanly.
