

Automatic Folding Container Type for Catering Industry

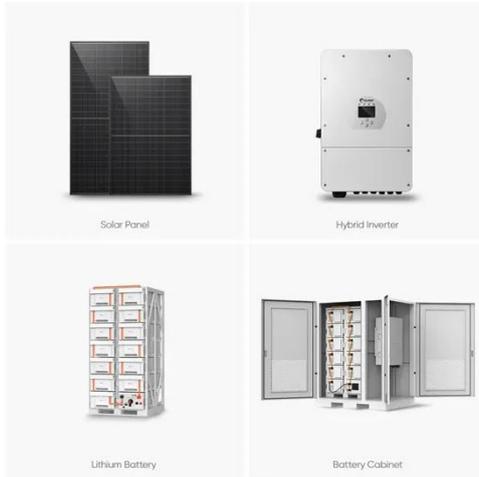

Overview

What are the Different Types of Carton Box Folding Machines?

There are three main types of carton box folding machines available in the market, each offering distinct functionalities and advantages. These types are:

- **Folding cartons** are flat, lightweight boxes made from paperboard or cardstock, typically used for packaging various consumer goods. They are designed to fold into their desired shape, providing a convenient and cost-effective solution for product storage, protection, and promotion.
- **Air separators** are engineered explicitly for selecting.
- **Product Type:** Different machines are suited to liquids, solids, or powders.
- **Container Size:** Machines with adjustable settings provide flexibility. By automating these tasks, companies can increase.
