

# Base size of solar inverter

## Overview

---

This guide breaks down what size solar inverter you actually need—so your setup runs smooth, efficient, and stress-free from day one. **What Size Solar Inverter Do I Need?**

A solar inverter should closely match your solar system's output in kW—typically within 80% to 120% of your total. Your solar inverter serves as the translator between your panels and your home's electrical system. Solar panels generate direct current (DC) electricity, but your home runs on alternating current (AC). But here is the truth: you don't need to be an electrician to make a smart inverter choice. While there are several types of inverters including hybrid, grid-tie, and off-grid inverters they all perform. The optimal solar inverter size depends primarily on the power rating of the solar PV array.

## The Only Inverter Size Chart You'll Ever Need

During our research, we discovered that most inverters range in size from 300 watts up to over 3000 watts. In this

**Outdoor Cabinet BESS**  
50 kWh/500 kWh Battery Storage System  
Industrial and Commercial Energy Storage

- All In One**  
Integrating battery packs
- High-capacity**  
50 - 500kWh
- Degree of Protection**  
IP54
- Operating Temperature Range**  
-20~60°C(Derating above 50 °C)
- Intelligent Integration**  
integrated photovoltaic storage cabinet
- Rated AC Power**  
50-100kW
- Altitude**  
3000m(>3000m derating)

article, we guide you through the different inverter sizes. Additionally, you'll ...
