

# Battery electric vehicles bevs denmark

## Overview

---

Denmark's electric vehicle (EV) market strengthened further in 2025, consolidating the country's position as one of Europe's leading adopters of battery-electric vehicles (BEVs). EVs not only captured a large majority of new registrations over the year, but they also dominated Denmark's passenger car registrations. The spotlight highlights key trends in EV adoption and examines policy measures and market characteristics that are likely to shape EV uptake in these countries. 27% more than in 2023, when it was 63 000 vehicles. It has been growing in this country for already 7 years in a row.

Copenhagen, November 2025 — The Danish government has announced a one-year postponement of the planned increase in the national Registration Tax applied to. The Denmark EV Market is shaped by leading automakers including Volkswagen, Tesla, BMW, Mercedes-Benz, Volvo, Audi, Skoda, Nissan, and Geely Holding, each competing through diverse EV portfolios, strong brand positioning, and continuous investment in charging infrastructure partnerships.
