

# Beirut california solar energy

## Overview

---

Discover how the Desert Quartzite project will deliver 300 MW of solar energy and 150 MW of battery storage to California, powering 35 communities through sustainable energy solutions. Zaya Younan, founder and chairman of Younan Company, announced he is entering the large-scale renewable energy construction market with the launch of a utility-scale solar and storage project in California. The project will be developed under Soleil Renewable Energy, LLC, and will be one of the top. The 880MW solar-plus-project will be paired with a 460MW BESS and is forecast to begin operations in mid-2028. [Link copied!Copy failed!](#) Commercial operation is targeted for mid-2028, subject to completion of environmental permitting and. The Building Energy Efficiency Standards (Energy Code) include requirements for solar photovoltaic (PV) systems, solar-ready design, battery energy storage systems (BESS), and BESS-ready infrastructure. A solar PV system is prescriptively required for all newly constructed buildings. state of California because of high insolation, community support, declining solar costs, and a renewable portfolio standard which requires that 60% of California's electricity come from renewable resources by 2030, with 100% by 2045. [1] Much of. The Solar Energy Industries Association® (SEIA) is leading the transformation to a clean energy economy.
