

BloombergNEF Chemical Energy Storage

Overview

The research and analysis firm has just published its 2H 2025 Energy Storage Market Outlook report, tallying global deployments and summarising market developments in the first half of this year, while forecasting the outlook ahead. It appeared first on the Bloomberg Terminal. The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty. Despite lowering its forecasts due to US-led tariff and policy disruptions, BloombergNEF (BNEF) says 2025 will be a record-breaking year for energy storage. Add us as a Google Preferred Source to see more of our articles in your search results. NineDot Energy installs batteries. Clean energy supply chains, including equipment factories and battery- metal production assets, saw \$130 billion in investment in 2024, a dip compared to a year earlier.
