

Blow molding solar bracket

Overview

Imagine a single production line that converts virgin HDPE/PP pellets into a complete, ready-to-float solar mounting frame in less than 90 seconds. Our patented extrusion blow-molding machine does exactly that—delivering a one-piece, hollow-core pontoon that is lighter than steel, stronger than. An innovative floating solar power generation system that combines many unique structures created by Kyoraku. Based on the concept of MADE IN JAPAN production, we have created a unique special structure using the technology we have cultivated over many years as a blow molding manufacturer. With JWELL solar floating blow molding machine, adopts a specially designed high-efficiency screw extrusion system, a storage mold, a servo energy-saving device and an imported PLC control system, and a special model is customized according to the product structure to ensure efficient and stable. The Floating Solar Mounting System L5 is a cutting-edge innovation in renewable energy, leveraging the sun's power on water to produce clean electricity. This system offers distinct advantages over traditional solar installations, making it a game-changer in the pursuit of sustainable energy. The solar power plant is built on the water by using a floating racking platform to support the electric panels and connect all the panels together. Think of it as a waterbed net made of strong. Description: Chinese blow molding TOP manufacturer, JWELL Blow Molding Machine for FPV Floating photovoltaic power station, FLOATING PV SYSTEM, solar power industry. All key parts made by own CNC workshop. Equip with Land resource conservation: Availability on water reservoir, fishpond, mining.

Blow molding solar bracket

Floating Solar Mounting System

The Floating Solar Mounting System installs solar panels on water to maximize space use, improve efficiency with water cooling, and conserve land.

Solar float blow molding machine

The solar power plant is built on the water by using a floating racking platform to support the electric panels

Product Model
 HU-ESS-215A(100KW/215KWh)
 HU-ESS-115A(50KW/115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled

and connect all the panels together. These pontoons are hollow structures, made by a blow ...
