

# Brazil s industrial and commercial solar energy storage system

## Overview

---

Brazil's new 2025 energy storage regulations create urgent opportunities for businesses to pair solar with lithium batteries. Batteries enable off-grid operation during peak congestion, ensuring uninterrupted. The Brazilian Association of Energy Storage Solutions (ABSAE) predicts that installations in Brazil's commercial and industrial (C&I) segment should exceed 2 GWh in 2026. In addition, the group expects procurements of approximately 8 GWh in the auction scheduled for April, which will procure. As the share of solar power in Brazil's electricity matrix grows on both transmission and distribution grids, so does the need for flexibility and management of non-simultaneous generation and consumption. 2 GW), the long-term outlook remains robust, with conservative estimates pointing to 90 GW and.
