

# Budapest grid-connected solar solar container power supply system

## Overview

---

ON is building a new battery energy storage facility in Soroksár (part of Budapest), which will enable the connection of new solar systems and increase security of supply. Electric utility company E. The Hungarian Electricity Act was amended in early 2025 to include regulations concerning the shared use of producer lines and grid connection points by multiple power plants or BESS systems, each with a nominal capacity of at least 0.5 MW and owned by different entities. The new facility supports a growing push to green Hungary's power grid. Met Group Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up. As Central Europe accelerates its renewable energy adoption, the Budapest project combines: "Hybrid solar-storage projects now account for 38% of new EU renewable installations," reports the 2023 European Solar Market Survey. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. This position ensures maximum energy density of 3,500. Hungary has taken a significant step forward in its energy transition with the inauguration of its largest standalone battery energy storage system (BESS).
