Overview

Africa's \$800 Billion Power Shift | How Burkina Faso Is Lighting Up a Continent

Africa has long been portrayed as a continent waiting — waiting for aid, waiting for permission, waiting for someone else to decide its future. But in West Africa, that narrative is being shattered. The First Phase of the Inter-Zonal Transmission Hub Project (ITHP), the third project in this series, was designed to connect power systems in Ghana and Burkina Faso by building a transmission line between Bolgatanga in Ghana and Zagatouli in Burkina Faso. The objective of the First Phase of the. In Burkina Faso, a fully state-funded 332-kilometer expressway now links Ouagadougou to Bobo-Dioulasso, financed with domestic resources and built by local labor, demonstrating infrastructure sovereignty under pressure. 55 billion USD in 2023, despite slowing growth from 5. The population has grown significantly, increasing pressure on energy resources. The data were compiled for the AICD study led by the World Bank. ZIP Download Zipped Shapefile Here: Burkina. Burkina Faso faces major energy challenges that affect its economic and social development. With limited energy resources, the country remains heavily dependent on imports to meet its energy needs.
