

# Can 2mm glass meet the requirements of solar glass

## Overview

---

Fully tempered 2 MM solar glass is 2 times stronger than heat-strengthened glass. PPG Industries announced that it can produce heat-strengthened Solarphire® PV, Solarphire AR/2XAR and Solarphire NaB glasses in thicknesses of less than 3 millimetres with surface-compression strength that exceeds that of fully tempered glass (greater than 10,000 pounds per square inch). Critical. Solar panel glass thickness directly impacts durability, efficiency, and ROI for commercial and residential installations. This guide explores global standards, technical trade-offs, and emerging trends - with actionable data to help buyers and manufacturers optimize their choices. We provide customized products in a range of sizes and thicknesses to meet our customers' needs. Glass Size Contact Us | Terms of Use Copyright © 1989 - 2020 Xinology Co. It is called the "crystal prince" of the glass family.
