

Can 4 grosolar container of 12v solar container lithium battery packs be connected in series to 48v

Overview

For instance, Redodo permits a maximum of four 12V lithium batteries to be connected in series, resulting in a 48-volt system. It's essential to always consult the battery manufacturer to ensure adherence to their recommended limits for series connections. Yes, you can mix different capacity lithium batteries, whether a normal 12V 100Ah battery or a Lithium server rack battery. Each pack should be able to handle at least 3/4 your total load current. Figure 1 below shows a typical EarthX 13. 2V LiFePO4 starter battery cell configuration.
