Overview

Despite our cloudy weather through much of the year, solar works very well here in the Pacific Northwest, Oregon, and Washington!. Despite our cloudy weather through much of the year, solar works very well here in the Pacific Northwest, Oregon, and Washington!. According to the Solar Energy Industries Association (SEIA), the price of solar panels has dropped by more than 60% since 2010. This reduction in costs, combined with generous federal and state incentives, makes solar more accessible to homeowners of all income levels. Let's take a closer look at. Solar panels can produce energy wherever there is light. Even the cloudy, forested Pacific Northwest is a viable location for solar panels. We specialize in a comprehensive range of solutions: residential, commercial, battery backup, and even off-grid systems. Germany's latitude is roughly equal.
