

# Can photovoltaic panels replace plastic tents

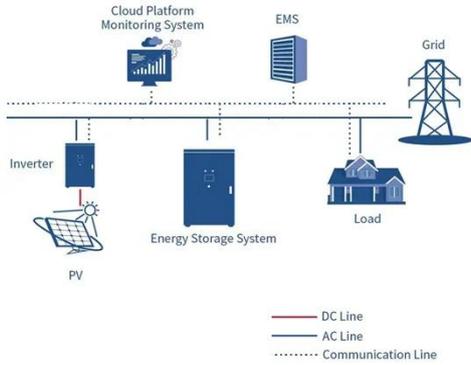

## Overview

---

Solar power is a common alternative energy source these days, and it's not just giant solar panels on buildings anymore. military is developing flexible solar-panel fabric that can be used for tents and uniforms. And on the civilian front, you can use small, portable solar panels to power. If you're living on the move, boating, RVing, or just camping off grid, flexible solar panels are incredibly appealing. This electricity is usually stored in a built-in battery pack or connected to an external power bank, allowing campers to charge devices, power lights, and run small.
