

# Can the bedside be placed in a locker

## Overview

---

Hospital bedside lockers allow patients to access all they want conveniently. They can store electronics, medicines, clothes, and books they require throughout their hospital stay. This promotes hygiene and makes the stay less stressful since they can adjust their routine. What is a Bedside Locker?

A bedside locker, also known as a bedside cabinet, bedside table, or hospital bedside stand, is a piece of essential medical support furniture designed for use in patient rooms. Globally, improving hospital environments is a priority for healthcare systems, and something as simple as a functional bedside locker.
