

# Chad Communications Off-Grid Energy Storage Project

## Overview

---

Supported by RelyEZ Energy Storage, the Chad solar energy storage project features a 2MW photovoltaic power generation system, a 500kW diesel generator, and a 6.4MWh lithium battery storage system to create an off-grid power supply system. This project is expected to reduce power costs by about. Release by Scatec, a subsidiary of the Norwegian renewables company Scatec ASA, has completed construction of a 36 MW solar PV plant integrated with a 20 MWh battery energy storage system in Chad. It was delivered under a leasing model, making it the first of its kind in the country, which has one. Chad has one of Africa's highest solar penetration rates, a result of a small power system with just 12% electrification, as large-scale solar and storage projects gather pace around N'Djamena, even as political uncertainty over oil revenues constrains faster deployment.

## Chad Communications Off-Grid Energy Storage Project

---

### Chad energy storage project tender announcement

Chad has launched an auction calling for a consulting engineer to control and supervise the build of a 30 MW (AC) solar power plant - with a 60 MWh storage system, 90 kV line and 90/33 kV
