

# Chile solar container energy storage system subsidies

## Overview

---

As part of the 2025 national budget, Chile is allocating \$1.2 billion in subsidies specifically for energy storage initiatives. Priority funding is directed toward integrated solar-plus-storage demonstration projects in the Atacama Desert, aiming to accelerate the energy transition in northern Chile. Did you know Chile's government subsidy for mobile solar containers could cut your energy costs by 45% in 2025?

As mining companies and remote communities scramble to meet Chile's 70% renewable energy target, these portable power stations are rewriting the rules of energy access. Let's unpack how. All renewable energy projects, including utility-scale solar power plants, are eligible for tax exemptions until 2035, with solar PV projects receiving up to 15 years of tax relief. Ensuring projects are paid for injecting power into the grid during peak periods has supported growth, and ambitious battery energy. Between 2023 and 2030, 5.7 GWh of energy storage is forecast to be installed:

- Chile's administration considers storage strategic for the country's goals (at least 60% of renewables by 2030, 100% by 2050). It proposed a law to allow the tender of 2 GW of BESS at a \$2 billion cost.
