

# Chilean double-glass modules

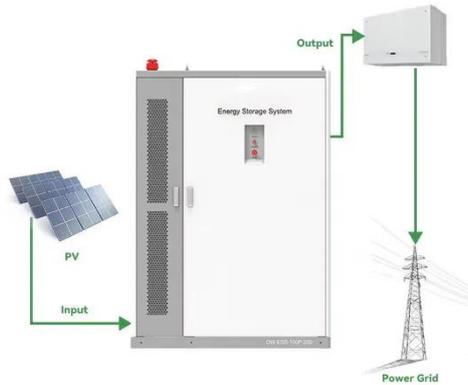

## Overview

---

Two-sided double-glazed modules, symmetrical structural design, low risk of hidden cracks. Higher power output even under low irradiance environments like on cloudy or foggy days 3-fold IEC new standard tests passed, 15-year material warranty, and 30-year power warranty. It focuses specifically on the investment case for producing high-efficiency bifacial glass-glass modules, showing how specialized technology can unlock superior returns and attract project financing. Unlike traditional single-glass modules, double glass designs use two layers of tempered glass, enhancing resistance to. According to our (Global Info Research) latest study, the global Double Glass Module Photovoltaic Glass market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period. DAS Solar is always a faithful companion where there is light. Bifacial ratio reaches 80%,30% more module power generation than conventional modules. The market's expansion is fueled by several key factors.

## Chilean double-glass modules
