

Overview

The proposal is expected to be approved by the Office of the General Comptroller this year and includes recognizing capacity payments for "stand-alone" energy storage systems, recognizing higher capacity payments for storage systems with longer hours of capacity, providing. The proposal is expected to be approved by the Office of the General Comptroller this year and includes recognizing capacity payments for "stand-alone" energy storage systems, recognizing higher capacity payments for storage systems with longer hours of capacity, providing. Fitch Ratings-Sao Paulo/New York-01 April 2025: Project finance transactions in Chile are expected to increase due to the recent commissioning of large battery energy storage systems (BESS), Fitch Ratings says. This should balance electricity supply and demand while reducing price volatility for. Ensuring projects are paid for injecting power into the grid during peak periods has supported growth, and ambitious battery energy storage system (BESS) targets are now being pursued to tackle curtailment. Solar and energy storage deployment is booming in Chile, spurred on by supportive government. In 2025, Chile's energy sector saw a surge of green Power Purchase Agreements (PPAs) and associated investments, signalling a maturation of its renewable energy market. 7 GW pipeline of BESS projects in Chile, far and away the most advanced front of the meter (FTM) storage market in Latin America.

Chilean phase change energy storage prices

PPA Tracker: Chile's 2025 PPA Landscape Strengthens Its Position ...

These deals--ranging from solar-only contracts to solar-plus-storage hybrids and project acquisitions--underscore a shift in Chile from generation-centric renewable deployment toward ...
