

# China Construction Solar Power Station

## Overview

---

China has started work on a gigawatt-scale open-sea solar farm, touted as the world's largest solar plant of its kind. Covering an area of 1,223 hectares in the Shandong province, the project uses 2,934 photovoltaic panels on platforms that are each 60 meters (196 feet) in length and 35 meters (114. The installation, located in Urumqi in the northwestern region of Xinjiang, in the Gobi Desert of China, has 3. State-owned China Green Development Group (CGDG) is behind the project. The company said a. POWERCHINA's core competitiveness of industrial management, development planning, survey and design, EPC contracting and project investment, operation and maintenance in the solar power industry is the backbone of the development of China's solar power.

### Solar power in China

OverviewControversyHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industry

The government subsidies for solar power energy projects have been considered "unsustainable" as the costs of subsidizing a rapidly growing industry are massive and some of China's struggles dealing with the costs have become visible. The renewable energy fund, which is paid by consumers, has a 100 billion yuan deficit while tariff payments have occasionally been paid late. Government subsidies for solar power have also been attributed to over construction, as many solar power projects have been f...
