

China National Nuclear Corporation Solar Power Generation Project

Overview

The 2 million kW PV demonstration project by the China National Nuclear Corporation (CNNC), one of the country's largest nuclear power operators, integrates PV and nuclear power, which can effectively reduce the negative impact on the marine ecosystem and supply more clean energy. The 2 million kW PV demonstration project by the China National Nuclear Corporation (CNNC), one of the country's largest nuclear power operators, integrates PV and nuclear power, which can effectively reduce the negative impact on the marine ecosystem and supply more clean energy. The facility will save 680,000 tonnes of standard coal and reduce carbon dioxide emissions by 1. The project is expected to reduce carbon dioxide emissions by 1. Construction of China's largest offshore solar farm officially commenced at Haibin harbor in Lianyungang city, East China's Jiangsu Province on Sunday, China National Nuclear Corp (CNNC) said, another milestone in the country's intensifying green transformation in aligning with its carbon. This photo taken on shows a crawler crane lifting the circular belt of the reactor dome of the Tianwan nuclear power plant Unit 7 in East China's Jiangsu province. 38bn) CNNP breaks ground on 2GW offshore solar PV farm in China.

China National Nuclear Corporation Solar Power Generation Project

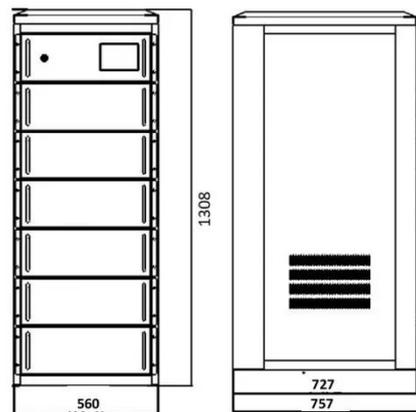

Power Generation of CNNC Yumen Yumen Xin' ao 100,000kw Molten Salt

The CSP project was successfully connected to the power grid on Septem, marking the first "CSP + PV + wind power" project in China to achieve full - capacity operation.
