

China s giant solar power plant

Overview

China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang. The plant covers an area of 33,000 acres (200,000 Chinese mu) and is reported to have an output of 6. The installation, located in Urumqi in the northwestern region of. A giant solar power station in space is to harvest unlimited solar energy without being affected by night and day nor seasons.
