

# China s largest photovoltaic support project

## Overview

---

China Three Gorges Group has connected to the grid a 1 GW hybrid concentrated solar power (CSP) and photovoltaic (PV) project in Hami, Xinjiang. The facility, described as the largest integrated CSP-PV complex worldwide, marks a new step in large-scale renewable energy deployment. A solar power project in the Gobi Desert has moved the needle on the size and scope of global photovoltaic installations, aided by innovation in equipment and construction. The installation, located in Urumqi in the northwestern region of China, is now the world's largest, supplying clean energy to millions while fueling AI data centers.
