

# China s total wind power generation in one year

## Overview

---

The country added 120 GW of wind and solar power in 2022, 290 GW in 2023, 360 GW in 2024, and 434 GW last year, of which about 119 GW of wind power and 315 GW of solar power, according to NEA data. China is the world leader in wind power generation, with the largest installed capacity of any nation [1] and continued rapid growth in new wind facilities. In 2024, the newly installed power, exceeding China's 14th Five Year Plan for Renewable. China is cementing its position as the global leader in renewables development with 180 GW of utility-scale solar and 159 GW of wind power already under construction 1.9 billion kWh, accounting for 9.
