

Cm600ha24h module can be used as high frequency inverter

 Extreme Light Weight

 X3 Extended Cycle life

 Low Self Discharge

 Superior Cranking Power

 Completely Sealed

 Environmental

Overview

It features an integrated freewheeling diode with ultra-fast recovery (approximately 135 nanoseconds), optimizing it for high-frequency operations ranging from 20 to 25 kHz. Mitsubishi IGBT Modules are designed for use in switching applications. Each module consists of one IGBT Transistor in a single configuration with a reverse-connected super-fast recovery free-wheel diode.

Cm600ha24h module can be used as high frequency inverter

Cm600ha24h module can be used as a high-frequency inverter

Advanced microinverters and power optimizers now maximize energy harvest from each panel, increasing system output by 25% compared to traditional string inverters.
