

Coke bottles used as solar panels

Overview

The design was inspired by the Moser bottle, which is a water-filled bottle used to diffuse sunlight into a room during the day. Instead of sunlight, however, this design uses an LED to provide the light, for decorating a garden or for use when out camping or traveling. Of course, they're available cheaply from most hardware and garden stores, but if you're more of the DIY type, you might like to build your own. [opengreenenergy] has done just that, using recycled materials for a cheap and simple design. The beverage industry, responsible for producing over 500 billion plastic bottles annually, has found an unlikely ally in solar technology to tackle both environmental concerns and rising costs. In 1880, Thomas Edison patented a lightbulb made from a glass tube and cotton thread filament. In 2002, Brazilian mechanic Alfred Moser had his own eureka moment. Designed and developed by students from the Massachusetts Institute of Technology (MIT), the Solar Bottle Bulb is based on the principles of Appropriate Technologies - a concept that provides simple and easily replicable technologies that address basic needs in developing communities. " Rolling blackouts and. A 400kWp rooftop solar PV installation at Coastal Bottlers' plant in Mombasa, Kenya, is helping the soft drinks bottler to transition one of its PET production lines to a cleaner and more affordable source of energy.
