Overview

This paper describes a Web service based network construction using communication protocol stack which is included in IEC 61400-25-4. This system is necessary to implement remote control systems for wind power plants. Keywords: IEC 6140-25, Wind Power Plants, Web Service, MMS. 5G Communication Base Stations Participating in Demand. 5G base stations (BSs), which are the essential parts of the 5G network, are important user-side. An individual base station with wind/photovoltaic (PV)/storage system exhibits limited scalability, resulting in poor economy and reliability. The Wind Power Plants. Method First, a PTN+ integrated small base station with large signal coverage and strong reliability was built, and then the 5G integrated small base station with the PTN gateway were integrated to achieve fast and convenient 5G signal coverage through broadband PTN access. In this article, we will delve.
