

# Cost of Grid-Connected Energy Storage Containers for Base Stations in Australia

Sample Order  
UL/KC/CB/UN38.3/UL

## Overview

---

Modo Energy's industry survey reveals key Capex, O&M, and connection cost benchmarks for BESS projects. The Department of Energy's (DOE) Energy Storage Grand Challenge (ESGC) is a comprehensive program to accelerate the development, commercialization, and utilization of next-generation energy storage technologies and sustain American global leadership in energy storage. Recent project data reveals significant regional variations: Our team at EK SOLAR recently helped a 200MWh project in California reduce interconnection costs. Several battery chemistries are available or under investigation for grid-scale applications, including lithium-ion, lead-acid, redox flow, and molten salt (including sodium-based chemistries). 1 Battery chemistries differ in key technical characteristics (see What are key characteristics of battery). We received 30 responses, covering 2.8 GW of battery energy storage projects - with commissioning dates from 2024 to 2028. \$2.82 billion by 2030, at a CAGR of 20.

## Cost of Grid-Connected Energy Storage Containers for Base Stations

---

### Basic price of grid-connected energy storage

Pacific Northwest National Laboratory's 2020 Grid Energy Storage Technologies Cost and Performance Assessment provides a range of cost estimates for technologies in 2020 and 2030 as ...
