

Cost of a 50kW Energy Storage Battery Cabinet for a Substation

Overview

The cost of a 50kW lithium-ion battery storage system using LiFePO4 technology can range from \$30,000 to \$60,000 or more, depending on the quality and brand of the batteries. In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an analysis of recent publications that include utility-scale storage costs. Lithium-ion batteries tend to be on the higher. The RUIXU 50kWh Lithium Battery Kits are high-performance, rack-mounted energy storage solutions designed for residential, commercial, and off-grid applications.
