

# Cost of microinverters in Ireland

## Overview

---

As of February 2026, Pinergy are offering the best microgeneration rate of 25.0 cents per kWh including VAT. The Microgeneration Support Scheme (MSS) allows homeowners to sell excess electricity. AC is the calm, collected adult of the electricity world—it's stable, predictable, and politely alternates its direction, making it perfect for powering everything from your toaster to your TV. If you try to pump raw DC electricity into your AC-powered home, things will go very, very badly. Performance Trade-off: While microinverters add \$1,500-\$3,000 to a typical residential solar system, they can increase energy production by 5-25% in shaded or complex roof conditions, often justifying the premium through enhanced long-term performance and 25-year warranties. In this blog, we will explore Optimisers vs. The Government Microgeneration Support Scheme is now available so that those with a registered microgeneration device.
