

Cost price of container wind power base station in Ukraine

Overview

The total project cost is estimated at \$220 million. The project is insured against war risks with the support of the German government — another important signal of the new investment reality. Prior to the full-scale invasion in 2022, Ukraine had over 2 GW of installed wind capacity. Wind energy accounted for over 20% in its renewable energy mix, second only to solar power, with 34 wind parks and 699 turbines (mostly Nordex) in operation. [4] By the end of 2017, 505 MW of wind power plants. Despite the war's challenges, in 2023, DTEK Networks connected over 1,400 new RES facilities to the system, commissioning 182.3 MW of wind and approximately 500 MW of solar power plants. This ambitious goal shows the country's commitment to clean energy and energy independence.

Wind power in Ukraine

One GW was planned to be added in 2022, but the Russian invasion stalled

development. Wind farms are more resilient to attack than large gas and coal-fired power stations, because they are spread over a larger area so many more missiles are needed to destroy them. Before the war, Ukraine had around 55 GW of power station capacity, mainly coal, nuclear and gas. By 2024, Russian missiles and takeovers had reduced this to 20 GW. Of the 700 wind turbines in Ukraine, Russian drones damaged 11, includin...
