

Croatia new york electric grid

Overview

Experts are warning that Croatia could face a repeat of the major electricity network failure that occurred during the summer of 2024. That blackout, which originated in Montenegro and quickly spread into Croatia, revealed serious weaknesses in the national energy. The entire New York statewide electricity system will undergo dramatic changes as it evolves to become a zero emissions grid by 2040. Below is a representative visualization of how this transformation could potentially take place across the State using information from an Initial Scenario in the. Loading. The current state of the electrical grid in New York is uncertain—the upstate region, while reliable now, is seeing potential for large load growth leading to reliability shortfalls, and the downstate region faces significant reliability challenges starting as soon as summer, 2026. Generator. (Montel) Croatia's power grid faces the risk of blackouts without urgent investment, as a large part of the country currently uses just one 400 kV line, local energy experts told Montel.
