

Croatia uses solar power for home use

Overview

The greatest progress in 2024 was made in the installation of integrated solar power plants on homes and industrial facilities. In 2025, the Croatian government launched a groundbreaking subsidy program that covers up to 50% of the costs for residential solar installations. This initiative includes solar panels, battery storage, and electric vehicle chargers, significantly lowering the financial barrier for homeowners. Starting Janu, Croatia will introduce a major change for new solar energy users — ending the current generous net metering system and replacing it with a new net billing model. However, placing these plants on properties in coastal areas brings specific challenges. 4% of the country's total electricity.
