

# Cuba Energy Group Energy Storage Equipment Project Cost

## Overview

---

ATESS is playing a key role in Cuba's renewable energy transformation by offering advanced energy storage solutions that address grid instability, enhance energy independence, and maximise the use of solar resources. At \$300 million, the project clocked in at \$450/kWh. Why so “cheap”?

. Building a Cleaner, More Resilient Energy System in Cuba recommends numerous ways by which domestic policy in Cuba can prioritize working towards a more sustainable, resilient grid -- especially by investing in the energy transition-- and ways in. The ongoing bidding process has attracted global energy storage. Take María's paladar (private restaurant) in Trinidad: a \$3,000 solar+storage setup increased her daily revenue by 200%—no more spoiled lobster during outages. “If a part breaks, we MacGyver.
