

Cuba solar Panel Project

Overview

The Cuban government's plan is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 MW. These are part of a broader project running until 2028, which aims to build 92 parks, with the goal of adding more than 2,000 MW to the National. HAVANA TIMES - On Febru, the first solar photovoltaic park was inaugurated, with a capacity of 21. 87 MW, located in the central province of Sancti Spíritus, began operations after just over two months of installation. 8. The national plan prioritizes solar, wind, hydroelectric, and biomass energy to reduce its dependence on imported fossil fuels and stabilize the energy system. The energy stabilization program also includes the repair of the country's thermoelectric plants, which have been the backbone of the. The plan aims for one thousand megawatts of solar energy by 2025, but without installed batteries, which prevents meeting nighttime demand and limits its effectiveness against persistent blackouts.
