

# Current investment cost of household energy storage

## Overview

---

The average energy storage cost in 2025 is different in many places. It depends on how big the system is and what technology it uses. Most homes and small businesses pay between \$6,000 and \$23,000 for everything. This covers the battery, inverter, labor, and other parts. Let's break it down across four major factors: 1. Power Outages In blackout-prone areas (e., South Africa, California), battery. This report is available at no cost from NREL at [www.Golden, CO](http://www.Golden.CO): National Renewable Energy Laboratory. DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment The U.
