

Customization of various solar container lithium battery packs

Overview

Our proprietary technology makes it possible to create custom battery packs to meet various operating requirements cost-effectively. However, the cells can't charge when the temperature drops under 35 degrees Fahrenheit. If you put your equipment in a shed, you may have a problem on some winter days. From compact 18650 and 21700 packs to medium-sized applications like robotics and portable equipment, our solutions deliver reliable performance, safety, and seamless integration. This includes intrinsically safe designs for harsh environments, custom battery chargers, custom molded enclosures up to IP68 for extreme protection, and complex battery. With over 20 years of experience, NPP Power specializes in custom lithium battery pack manufacturing. We build the batteries powering the global shift toward electrification. Whether you're retrofitting existing equipment or launching something entirely new, we design and make lithium-ion systems. Designing, developing and manufacturing customised lithium-ion battery packs using a full range of battery chemistries, Alexander Battery Technologies delivers incredibly reliable custom battery packs for businesses across the industries we serve. We use our experience from the last 40 years to.
