

# Democratic republic of the congo energy storage policy

## Overview

---

There is no national energy policy in place nor national electrification plan due to limited institutional capacity. Instead, the government developed the National Strategic Development Plan (Plan National Stratégique de Développement [PNSD]), which has a section focusing on. A problem with this policy?

Tell us and we will take a look. Want to know more. The Democratic Republic of the Congo (DRC) faces numerous obstacles regarding the widespread adoption of energy storage technologies. Regulatory and Policy Frameworks, 4. EESS provide storage of electrical energy so that it can be used later. The approach is not new: EESS in the form of battery-backed uninterruptible power supplies (UPS) have been used for many years.
